CONSUMER PRICE INDEX
OCTOBER 2024
BRUNEI DARUSSALAM

MAIN HEADLINE:
CONSUMER PRICE INDEX CONTINUED TO RECORD A DECREASE IN OCTOBER 2024

1. *In October 2024, the Consumer Price Index (CPI) registered a 0.8 per cent decrease compared to October 2023, driven by a 0.8 per cent decrease in both Food and Non-Alcoholic Beverages and Non-Food indices.*

2. *The decrease in the Food and Non-Alcoholic Beverages index was mainly attributed to the fall in processed meat prices under the Meat category (1.6 per cent); and the decrease in the prices of Vegetables (3.4 per cent).*

3. *For the Non-Food index, lower price of air fares was the primary factor in the decline of the Transport category (1.5 per cent). In addition, the decline in garment prices in the Clothing and Footwear category (4.5 per cent) also contributed to the decrease in the Non-Food index.*

4. *For a month-on-month comparison, the CPI in October 2024 decreased by 0.3 per cent from September 2024. This was due to reductions in both Food and Non-Alcoholic Beverages; and Non-Food indices by 0.1 per cent and 0.3 per cent, respectively.*

5. *The decline in the Food and Non-Alcoholic Beverages index was primarily driven by lower prices of Fish and Seafood (0.4 per cent); and Meat (0.2 per cent). As for the Non-Food index, the decrease was mainly influenced by the prices of Clothing and Footwear (5.8 per cent); and Transport (0.2 per cent) categories.*

6. *The CPI is a measure of price changes of basket of goods and services paid by the consumer in a specified period and compiled on a monthly basis. The list of goods and services in the CPI is based on the average expenditure per household from the Household Expenditure Survey (HES). The CPI full report for October 2024 is available from the DEPS website at https://deps.mofe.gov.bn.*
