### Major Exports

On a y-o-y basis, major exports increased by 149.2 per cent in November 2021. This was due to increases both in exports of Crude Oil and LNG by 258.0 per cent and 106.8 per cent respectively.

The increase of Crude Oil exports was due to an increase in exports price by 103.1 per cent to USD83.91 per bbl from USD41.32 per bbl in November 2020. Furthermore, the exports volume also recorded an increase of 38.8 per cent to 67.63 kbbl per day from 48.73 kbbl per day in November 2020.

Meanwhile, the increase in exports of LNG was due to an increase in exports price by 80.4 per cent to USD10.94 per MMBtu from USD6.06 per MMBtu. Meanwhile, the exports volume of LNG also increased by 13.9 per cent.

On a m-o-m basis, major exports recorded a decrease of 7.7 per cent in November 2021. This was due to a decrease in exports of Crude Oil by 23.6 per cent. On the other hand, exports of LNG increased by 7.4 per cent.

### Main Mode of Transport

The main mode of transport for Brunei Darussalam's international merchandise trading is sea transport, followed by air transport, land transport and other modes of transport.

In November 2021, the total value of goods transported by sea for both exports and imports were BND2,246.4 million. The relative share of sea transport accounted for 98.9 per cent of goods exported from and 91.1 per cent of goods imported into Brunei Darussalam. Goods transported by air contributed about 0.9 per cent of goods exports and 6.3 per cent of goods imports, meanwhile cross border trading via land recorded 0.2 per cent of exported goods and 2.6 per cent of imported goods.

## TECHNICAL NOTES

### 1. Introduction

The International Merchandise Trade Statistics (IMTS) are compiled on a monthly basis based on the imports and exports data submitted by the Royal Customs and Excise Department, Ministry of Finance and Economy through customs declarations, and the Ministry of Energy. The general system of recording IMTS adopted by Brunei Darussalam covers imports, domestic exports and re-exports that have been cleared through customs.

### 2. Coverage of Merchandise

All goods imported into or exported from Brunei Darussalam are included in the IMTS.

The following classes of goods are excluded:

- currency notes and coins in circulation;
- personal and household effects which do not incur any Brunei Darussalam customs duty and which are taken by passengers for their own use;
- stores and fuel supplied to Brunei ships and aircraft;
- articles on loan or rent, for example, equipment for oil surveys and experimental drilling, etc.;
- goods in transit;
- fish and other marine products landed from Brunei Darussalam fishing vessels direct from fishing grounds;
- goods imported and exported by or on behalf of diplomatic services; and
- goods imported by the armed forces.

### 3. Time of Recording

Brunei Darussalam uses the 'release date' as its time of recording, which provides the time/date that stipulated in source documents when goods enter or leave the economic territory.

### 4. Valuation

Imports are valued at CIF, that is, the value of goods at the frontier of the exporting trading partners plus the cost of insurance and freight and any other charges when sold for export to Brunei Darussalam. Custom duties are not included in the value of imports.

Exports are valued at FOB, that is, the value of goods to be purchased abroad up to the point where the goods are deposited on board the outgoing vessel, aircraft and/or vehicle. Goods on consignment are valued at the current import price for imports and the current export price for exports.

Goods are recorded at their market value. Values are reported in millions of Brunei dollars. Data reported in foreign currencies are converted into local currency at the prevailing market exchange rate on the date of permit clearance.

## 5. Commodity Classification

Commodity items reported are classified in accordance with the Brunei Darussalam Trade Classification and Customs Duties 2017. This classification incorporates the ASEAN Harmonized Tariff Nomenclature (AHTN), which is based on the 6-digits Harmonised Commodity Description and Coding System Nomenclature (H.S) developed by the World Customs Organisation (WCO).

For International comparability in this report, import and export are classified according to the United Nations Standard Trade Classification, Revision 4 (SITC Rev. 4) for the purpose of international comparability of statistics on external trade.

The imports data can also be categorized according to their end-use categories, namely Capital, Intermediate or Consumption based on Brunei Darussalam's Broad Economic Categories (BDBEC), which is adapted from United Nation, the Fifth revision of Broad Economic Categories.

The BDBEC is classified in accordance with Broad Economic Category introduced by the United Nations and as a means for converting data compiled in terms of SITC into end-use categories.

The BDBEC provides categories which can be aligned into 3 large classes of goods in the System of National Accounts (SNA):

- Capital Goods are used as a means of producing other goods or services.
- Intermediate Goods are semi-processed, semi-manufactured and industrial-supplies; and transformed or used up in the production of goods and services.
- Consumption Goods are final product mainly used by households for final consumption.

## 6. Mode of transport

Merchandise trade in goods by mode of transport are compiled according to the means of transport used when goods enter or leave the economic territory of the economy. The following classifications are the main categories of the mode of transport:

1. Air;
2. Sea;
3. Land; and
4. Others include postal consignments, mail or courier shipments and goods crossing the border not to attribute a transaction to any specific mode of transport categories.

The method of transport used for the carriage of goods is recorded as the mode of transport such as aircraft, vehicle, vessel and other type of transport of goods. The mode of transport for imports refers to the last mode of transport by which the cargo was transported to the port of clearance into the economy whereas, for exports the mode of transport information records the last mode of transport with which cargo crossed the customs border on its exit from the economy.
