INTERNATIONAL MERCHANDISE TRADE STATISTICS (IMTS) MARCH 2021

Highlights

- Total trade for the month of March 2021 was BND1,685.6 million, comprising exports valued at BND1,162.3 million and imports amounting to BND523.3 million. This represented an increase of 19.0 per cent year-on-year (y-o-y) from BND1,416.4 million in March 2020.
- The trade balance recorded a decrease of 10.0 per cent to BND639.0 million from BND709.8 million in March 2020.
- On a month-on-month (m-o-m) basis, total trade decreased by 6.2 per cent compared to February 2021 due to decreases in imports by 38.2 per cent. Meanwhile the exports recorded an increase of 22.4 per cent.

Table 1: Exports, Imports, Total Trade and Trade Balance

	Value (BND Million)			Change (%)		Value (BND Million)		Change (%)

Merchandise Exports

Exports by Commodity Section

On a y-o-y basis, the merchandise exports increased by 9.3 per cent to BND1,162.3 million in March 2021 from BND1,063.1 million in March 2020. Mineral Fuels recorded the highest share of total exports with 80.4 per cent (BND934.8 million) followed by Chemicals (BND200.8 million) and Machinery and Transport Equipment (BND10.5 million).

Meanwhile, on a m-o-m basis the merchandise exports increased by 22.4 per cent to BND1,162.3 million in March 2021 from BND949.3 million in February 2021.

Major Exports

On a y-o-y basis, major exports decreased by 10.2 per cent in March 2021. This was due to a decrease in exports of LNG by 39.0 per cent, meanwhile the exports of Crude Oil increase by 46.9 per cent.

The decrease in exports of LNG was due to lower in exports volume of LNG by 21.5 per cent to 754,785 MMBtu per day from 961,560 MMBtu per day (March 2020). The exports price also recorded a decrease of 18.1 per cent to USD7.01 per MMBtu from USD8.55 per MMBtu in March 2020.

However, the exports of Crude Oil increased due to an increase in exports price by 67.5 per cent to USD66.68 per bbl from USD39.81 per bbl in March 2020. However, the exports volume decreased by 7.8 per cent to 96.11 kbbl per day from 104.19 kbbl per day in March 2020.

On a m-o-m basis, major exports recorded an increase of 11.6 per cent in March 2021. This was due to an increase in exports of Crude Oil by 76.5 per cent.

Table 3: Major Exports

The major exports was also contributed by the domestic exports of Other Petroleum and Gas Products valued at BND621.6 million of which the major commodity was Other light oils having a flashpoint of less than 23 OC (kg) with a total value of BND150.4 million.

Exports by Trading Partners

The highest share of exports in March 2021 went to Singapore (31.1 per cent). This was followed by People's Republic of China (19.9 per cent), Japan (18.6 per cent) and Australia (9.6 per cent).

Chart 2: Share of Exports by Trading Partners

Merchandise Imports

Imports by Commodity Section

In March 2021, merchandise imports increased by 48.1 per cent (y-o-y) to BND523.3 million from BND353.3 million (March 2020). Mineral Fuels recorded the highest share of total imports with 38.8 per cent (BND203.1 million) followed by Machinery and Transport Equipment (BND121.2 million) and Food (BND65.5 million).

On a m-o-m basis total imports decreased by 38.2 per cent, attributed to the decrease of imports were Mineral Fuels; and Miscellaneous Manufactured Articles.

Table 4: Imports by Commodity Sections

Main Mode of Transport

The main mode of transport for Brunei Darussalam's international merchandise trading is sea transport, followed by air transport, land transport and other modes of transport.

In March 2021, the total value of goods transported by sea for both exports and imports was BND1,603.4 million. The relative share of sea transport accounted for 99.0 per cent of goods exported from and 86.4 per cent of goods imported into Brunei Darussalam. Goods transported by air contributed about 0.8 per cent of goods exports and 8.7 per cent of goods imports, meanwhile cross border trading via land recorded 0.2 per cent of exported goods and 4.9 per cent of imported goods.

Table 6: Exports and Imports by Mode of Transport

TECHNICAL NOTES

1. Introduction

The International Merchandise Trade Statistics (IMTS) are compiled on a monthly basis based on the imports and exports data submitted by the Royal Customs and Excise Department, Ministry of Finance and Economy through customs declarations, and the Ministry of Energy. The general system of recording IMTS adopted by Brunei Darussalam covers imports, domestic exports and re-exports that have been cleared through customs.

2. Coverage of Merchandise

All goods imported into or exported from Brunei Darussalam are included in the IMTS.

The following classes of goods are excluded:

- currency notes and coins in circulation;
- personal and household effects which do not incur any Brunei Darussalam customs duty and which are taken by passengers for their own use;
- stores and fuel supplied to Brunei ships and aircraft;
- articles on loan or rent, for example, equipment for oil surveys and experimental drilling, etc.;
- goods in transit;
- fish and other marine products landed from Brunei Darussalam fishing vessels direct from fishing grounds;
- goods imported and exported by or on behalf of diplomatic services; and
- goods imported by the armed forces.

3. Time of Recording

Brunei Darussalam uses the 'release date' as its time of recording, which provides the time/date that stipulated in source documents when goods enter or leave the economic territory.

4. Valuation

Imports are valued at CIF, that is, the value of goods at the frontier of the exporting trading partners plus the cost of insurance and freight and any other charges when sold for export to Brunei Darussalam. Custom duties are not included in the value of imports.

Exports are valued at FOB, that is, the value of goods to be purchased abroad up to the point where the goods are deposited on board the outgoing vessel, aircraft and/or vehicle. Goods on consignment are valued at the current import price for imports and the current export price for exports.

Goods are recorded at their market value. Values are reported in millions of Brunei dollars. Data reported in foreign currencies are converted into local currency at the prevailing market exchange rate on the date of permit clearance.

5. Commodity Classification

Commodity items reported are classified in accordance with the Brunei Darussalam Trade Classification and Customs Duties 2017. This classification incorporates the ASEAN Harmonized Tariff Nomenclature (AHTN), which is based on the 6-digits Harmonised Commodity Description and Coding System Nomenclature (H.S) developed by the World Customs Organisation (WCO).

For International comparability in this report, import and export are classified according to the United Nations Standard Trade Classification, Revision 4 (SITC Rev. 4) for the purpose of international comparability of statistics on external trade.

The imports data can also be categorized according to their end-use categories, namely Capital, Intermediate or Consumption based on Brunei Darussalam's Broad Economic Categories (BDBEC), which is adapted from United Nation, the Fifth revision of Broad Economic Categories.

The BDBEC is classified in accordance with Broad Economic Category introduced by the United Nations and as a means for converting data compiled in terms of SITC into end-use categories.

The BDBEC provides categories which can be aligned into 3 large classes of goods in the System of National Accounts (SNA):

- Capital Goods are used as a means of producing other goods or services.
- Intermediate Goods are semi-processed, semi-manufactured and industrial-supplies; and transformed or used up in the production of goods and services.
- Consumption Goods are final product mainly used by households for final consumption.

6. Mode of transport

Merchandise trade in goods by mode of transport are compiled according to the means of transport used when goods enter or leave the economic territory of the economy. The following classifications are the main categories of the mode of transport:

1. Air;
2. Sea;
3. Land; and
4. Others include postal consignments, mail or courier shipments and goods crossing the border not to attribute a transaction to any specific mode of transport categories.

The method of transport used for the carriage of goods is recorded as the mode of transport such as aircraft, vehicle, vessel and other type of transport of goods. The mode of transport for imports refers to the last mode of transport by which the cargo was transported to the port of clearance into the economy whereas, for exports the mode of transport information records the last mode of transport with which cargo crossed the customs border on its exit from the economy.
