# INTERNATIONAL MERCHANDISE TRADE STATISTICS JUNE 2022

## Top 3 Commodities

## Major Trading Partners

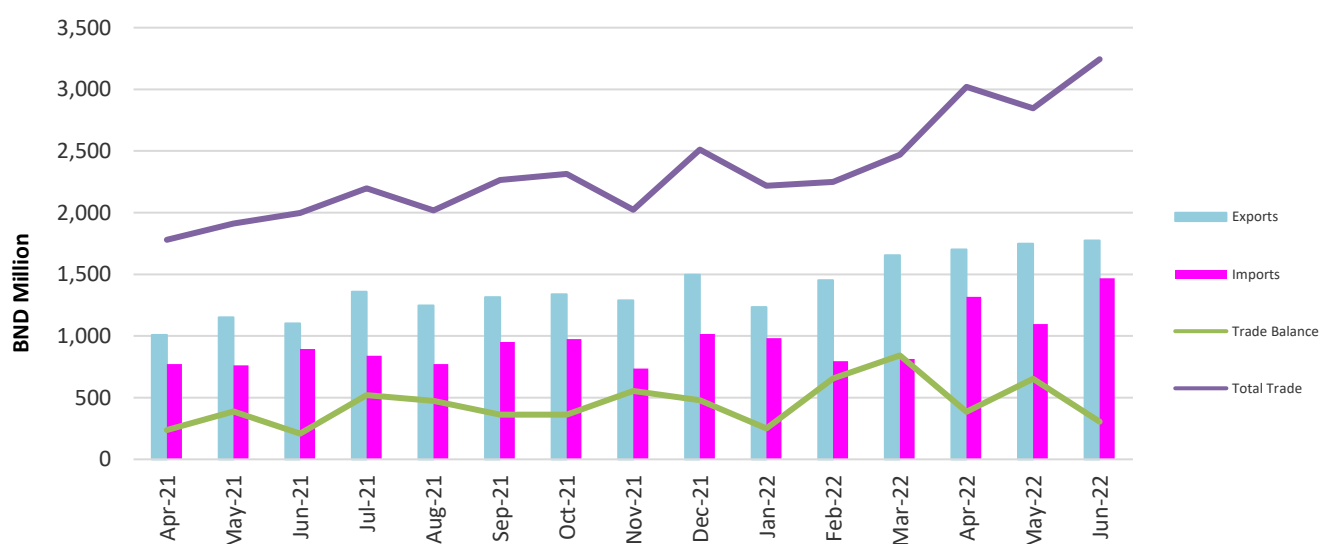

**INTERNATIONAL MERCHANDISE TRADE STATISTICS (IMTS) JUNE 2022****Highlights**

- Total trade for the month of June 2022 was BND3,244.1 million, comprising exports valued at BND1,775.1 million and imports amounting to BND1,469.0 million. This represented an increase of 62.5 per cent year-on-year (y-o-y) from BND1,995.9 million in June 2021.
- The trade balance recorded an increase of 47.5 per cent to BND306.1 million (June 2022) from BND207.5 million in June 2021.
- On a month-on-month (m-o-m) basis, total trade increased by 14.0 per cent compared to May 2022 due to an increase in imports by 33.9 per cent.

## Merchandise Exports

### Exports by Commodity Section

On a y-o-y basis, the merchandise exports increased by 61.1 per cent to BND1,775.1 million in June 2022 from BND1,101.7 million in June 2021. Mineral Fuels recorded the highest share of total exports with 76.2 per cent (BND1,352.0 million) followed by Chemicals (BND378.3 million) and Machinery and Transport Equipment (BND18.1 million).

Meanwhile, on a m-o-m basis the merchandise exports also increased by 1.5 per cent to BND1,775.1 million in June 2022 from BND1,749.4 million in May 2022.

### Major Exports

On a y-o-y basis, major exports increased by 56.2 per cent in June 2022. This was due to the increases in the export of Crude Oil and Other Petroleum and Gas Product by 39.1 per cent and 142.9 per cent respectively. However, exports of Liquefied Natural Gas decreased by 34.9 per cent.

The decrease in exports of LNG was due to the decrease in exports volume by 57.4 per cent to 335,102 MMBtu per day from 786,733 MMBtu per day (June 2021). However, the exports price increased by 47.3 per cent to USD13.50/MMBtu from USD9.16/MMBtu in June 2021.

On the other hand, the increase in exports of Crude Oil was due to an increase in the exports price by 74.8 per cent to USD129.04 per bbl from USD73.82 per bbl in June 2021. Nevertheless, the exports volume of Crude Oil decreased by 21.7 per cent to 61.09 kbbl per day from 78.00 kbbl per day in June 2021.

On a m-o-m basis, major exports also recorded a decrease of 0.8 per cent in June 2022. This was mainly due to decrease in exports of LNG by 45.2 per cent. Meanwhile exports of Crude Oil increased by 2.2 per cent.

 kbbbl = thousand barrels                      MMBtu = million metric British thermal units

The major exports were also contributed by the domestic exports of Other Petroleum and Gas Products valued at BND845.0 million of which the major commodity was Automotive Diesel fuels with a total value of BND387.1 million.

### Exports by Trading Partners

The highest share of exports in June 2022 went to Malaysia (30.7 per cent). This was followed by Australia (14.4 per cent), Singapore (12.6 per cent) and Thailand (11.8 per cent).

**Chart 2: Share of Exports by Trading Partners**

## Merchandise Imports

### Imports by Commodity Section

In June 2022, merchandise imports increased by 64.3 per cent (y-o-y) to BND1,469.0 million in June 2022 from BND894.2 million (June 2021). Mineral Fuels recorded the highest share of total imports with 78.5 per cent (BND1,153.0 million) followed by Machinery and Transport Equipment (BND101.1 million) and Food (BND75.0 million).

On a m-o-m basis, total imports increased by 33.9 per cent. The increase was mainly contributed in the imports of Miscellaneous Manufactured Articles; Minerals Fuels; Manufactured Goods; Food; and Beverages and Tobacco.

**Table 4: Imports by Commodity Sections**

### Imports by Trading Partners

The highest share of imports in June 2022 came from Malaysia accounting for 23.7 per cent followed by United Arab Emirates (22.9 per cent), Iraq (10.1 per cent) and Qatar (10.0 per cent).

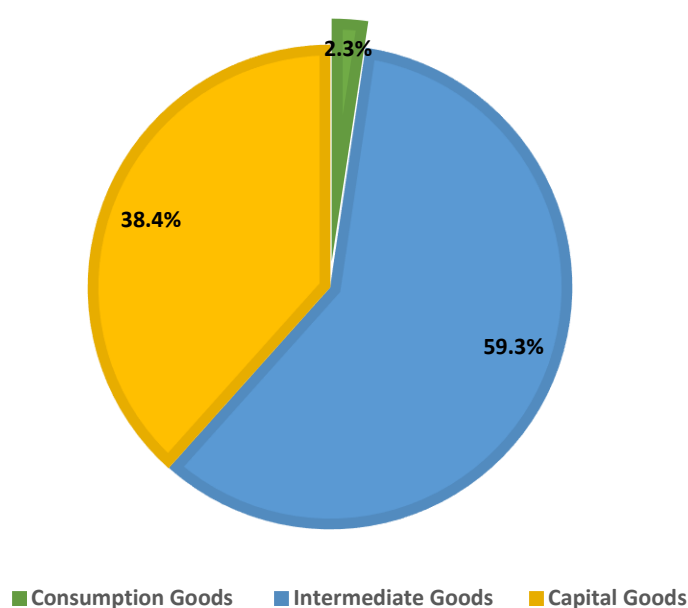

**Chart 3: Share of Imports by Trading Partners**

### Imports by End-Use Categories

In June 2022, imports of Intermediate Goods were valued at BND870.7 million, accounting for 59.3 per cent of the total imports. This was followed by Capital Goods (BND564.0 million or 38.4 per cent of total imports); and Consumption Goods (BND34.3 million or 2.3 per cent of total imports).

## Main Mode of Transport

The main mode of transport for Brunei Darussalam's international merchandise trading is sea transport, followed by air transport, land transport and other modes of transport.

In June 2022, the total value of goods transported by sea for both exports and imports were BND3,147.2 million. The relative share of sea transport accounted for 99.0 per cent of goods exported from and 94.6 per cent of goods imported into Brunei Darussalam. Goods transported by air contributed about 0.8 per cent of goods exports and 3.5 per cent of goods imports, meanwhile cross border trading via land recorded 0.2 per cent of exported goods and 1.9 per cent of imported goods.

**Table 6: Exports and Imports by Mode of Transport**

## TECHNICAL NOTES

### 1. Introduction

The International Merchandise Trade Statistics (IMTS) are compiled on a monthly basis based on the imports and exports data submitted by the Royal Customs and Excise Department, Ministry of Finance and Economy through customs declarations, and the Department of Energy, Prime Minister's Office. The general system of recording IMTS adopted by Brunei Darussalam covers imports, domestic exports and re-exports that have been cleared through customs.

### 2. Coverage of Merchandise

All goods imported into or exported from Brunei Darussalam are included in the IMTS.

The following classes of goods are excluded:

- currency notes and coins in circulation;
- personal and household effects which do not incur any Brunei Darussalam customs duty and which are taken by passengers for their own use;
- stores and fuel supplied to Brunei ships and aircraft;
- articles on loan or rent, for example, equipment for oil surveys and experimental drilling, etc.;
- goods in transit;
- fish and other marine products landed from Brunei Darussalam fishing vessels direct from fishing grounds;
- goods imported and exported by or on behalf of diplomatic services; and
- goods imported by the armed forces.

### 3. Time of Recording

Brunei Darussalam uses the 'release date' as its time of recording, which provides the time/date that stipulated in source documents when goods enter or leave the economic territory.

### 4. Valuation

Imports are valued at CIF, that is, the value of goods at the frontier of the exporting trading partners plus the cost of insurance and freight and any other charges when sold for export to Brunei Darussalam. Custom duties are not included in the value of imports.

Exports are valued at FOB, that is, the value of goods to be purchased abroad up to the point where the goods are deposited on board the outgoing vessel, aircraft and/or vehicle. Goods on consignment are valued at the current import price for imports and the current export price for exports.

Goods are recorded at their market value. Values are reported in millions of Brunei dollars. Data reported in foreign currencies are converted into local currency at the prevailing market exchange rate on the date of permit clearance.

## 5. Commodity Classification

Commodity items reported are classified in accordance with the Brunei Darussalam Trade Classification and Customs Duties 2017. This classification incorporates the ASEAN Harmonized Tariff Nomenclature (AHTN), which is based on the 6-digits Harmonised Commodity Description and Coding System Nomenclature (H.S) developed by the World Customs Organisation (WCO).

For International comparability in this report, import and export are classified according to the United Nations Standard Trade Classification, Revision 4 (SITC Rev. 4) for the purpose of international comparability of statistics on external trade.

The imports data can also be categorized according to their end-use categories, namely Capital, Intermediate or Consumption based on Brunei Darussalam's Broad Economic Categories (BDBEC), which is adapted from United Nation, the Fifth revision of Broad Economic Categories.

The BDBEC is classified in accordance with Broad Economic Category introduced by the United Nations and as a means for converting data compiled in terms of SITC into end-use categories.

The BDBEC provides categories which can be aligned into 3 large classes of goods in the System of National Accounts (SNA):

- Capital Goods are used as a means of producing other goods or services.
- Intermediate Goods are semi-processed, semi-manufactured and industrial-supplies; and transformed or used up in the production of goods and services.
- Consumption Goods are final product mainly used by households for final consumption.

## 6. Mode of transport

Merchandise trade in goods by mode of transport are compiled according to the means of transport used when goods enter or leave the economic territory of the economy. The following classifications are the main categories of the mode of transport:

1. Air;
2. Sea;
3. Land; and
4. Others include postal consignments, mail or courier shipments and goods crossing the border not to attribute a transaction to any specific mode of transport categories.

The method of transport used for the carriage of goods is recorded as the mode of transport such as aircraft, vehicle, vessel and other type of transport of goods. The mode of transport for imports refers to the last mode of transport by which the cargo was transported to the port of clearance into the economy whereas, for exports the mode of transport information records the last mode of transport with which cargo crossed the customs border on its exit from the economy.
