INTERNATIONAL MERCHANDISE TRADE STATISTICS

AUGUST 2024

BND Million

INTERNATIONAL MERCHANDISE TRADE STATISTICS (IMTS) AUGUST 2024

Highlights

Total trade for the month of August 2024 was BND2,025.8 million, comprising exports valued at BND1,260.4 million and imports amounting to BND765.4 million. This represented a decrease of 18.9 per cent year-on-year (y-o-y) from BND2,497.1 million in August 2023.

The trade balance recorded an increase of 23.2 per cent to BND495.0 million (August 2024) from BND401.7 million in August 2023.

On a month-on-month (m-o-m) basis, total trade recorded an increase of 2.9 per cent from BND1,969.1 million (July 2024) to BND2,025.8 million in August 2024.

Merchandise Exports

Exports by Commodity Section

On a y-o-y basis, the merchandise exports decreased by 13.0 per cent to BND1,260.4 million in August 2024 from BND1,449.4 million in August 2023. Mineral Fuels recorded the highest share of total exports with 75.5 per cent (BND951.5 million), followed by Chemicals 18.9 per cent (BND238.6 million) and Machinery and Transport Equipment 4.8 per cent (BND60.6 million).

Meanwhile, on a m-o-m basis the merchandise exports recorded an increase of 7.3 per cent from BND1,174.9 million in July 2024 to BND1,260.4 million in August 2024.

Main Domestic Exports

On a y-o-y basis, the main domestic exports decreased by 13.6 per cent in August 2024 due to a decrease in both Mineral Fuels and Chemicals by 6.9 per cent and 33.0 per cent respectively.

In August 2024, the decrease in exports of Chemicals was driven by a 38.9 percent fall in the exports of Chemical and Related Products from BND335.7 million in August 2023 to BND205.1 million in August 2024. On the other hand, the exports of Methanol increased by 75.0 per cent from BND18.4 million (August 2023) to BND32.2 million in August 2024.

Meanwhile, the exports of Mineral Fuels also decreased by 6.9 per cent driven by a 45.8 per cent decline in the exports of Other Petroleum Products from BND605.8 million to BND328.4 million. In contrast, exports of Crude Oil, LNG and Other Gas Products increased by 111.8 per cent, 12.6 per cent and 26.3 per cent respectively.

On a m-o-m basis, main domestic exports recorded an increase of 3.3 percent in August 2024. This was due to increases in both main domestic exports of Mineral Fuels and Chemicals by 2.6 per cent and 6.3 per cent respectively.

Exports by Trading Partners

The highest share of exports in August 2024 went to People's Republic of China (17.2 per cent). This was followed by Japan (16.1 per cent) and Australia (14.7 per cent).

Chart 2: Share of Exports by Trading Partners

Merchandise Imports

Imports by Commodity Section

In August 2024, merchandise imports decreased by 26.9 per cent to BND765.4 million from BND1,047.7 million in August 2023. Mineral Fuels recorded the highest share of total imports with 63.4 percent (BND484.9 million) followed by Machinery and Transport Equipment (BND83.5 million) and Food (BND63.3 million).

Meanwhile, on a m-o-m basis, total imports also recorded a decrease of 3.6 per cent, mainly attributed to the decrease import values of Crude Materials Inedible, Food, Machinery and Transport Equipment and Mineral Fuels.

Imports by Trading Partners

The highest share of imports in August 2024 came from Malaysia, accounting for 39.8 percent, followed by Russia (15.4 per cent) and Australia (10.5 per cent).

Chart 3: Share of Imports by Trading Partners

Imports by End-Use Categories

In August 2024, the import of Intermediate Goods was valued at BND450.9 million, accounting for 58.9 per cent of total imports. This was followed by Capital Goods (BND285.5 million or 37.3 per cent of total imports); and Consumption Goods (BND29.0 million or 3.8 per cent of total imports).

Main Mode of Transport

The main mode of transport for Brunei Darussalam's international merchandise trading is sea transport, followed by air, land and other modes of transport.

In August 2024, the total value of goods transported by sea for both exports and imports were BND1,927.6 million. The relative share of sea transport accounted for 99.1 per cent of goods exported from and 88.6 per cent of goods imported into Brunei Darussalam. Goods transported by air contributed about 0.8 per cent of goods exports and 7.6 per cent of goods imports, meanwhile cross border trading via land recorded 0.1 per cent of exported goods and 3.8 per cent of imported goods.

Table 6: Exports and Imports by Mode of Transport

TECHNICAL NOTES

1. Introduction

The International Merchandise Trade Statistics (IMTS) are compiled on a monthly basis based on the imports and exports data submitted by the Royal Customs and Excise Department, Ministry of Finance and Economy through customs declarations, and the Department of Energy, Prime Minister's Office. The general system of recording IMTS adopted by Brunei Darussalam covers imports, domestic exports and re-exports that have been cleared through customs.

2. Coverage of Merchandise

All goods imported into or exported from Brunei Darussalam are included in the IMTS.

The following classes of goods are excluded:

- currency notes and coins in circulation;
- personal and household effects which do not incur any Brunei Darussalam customs duty and which are taken by passengers for their own use;
- stores and fuel supplied to Brunei ships and aircraft;
- articles on loan or rent, for example, equipment for oil surveys and experimental drilling, etc.;
- goods in transit;
- fish and other marine products landed from Brunei Darussalam fishing vessels direct from fishing grounds;
- goods imported and exported by or on behalf of diplomatic services; and
- goods imported by the armed forces.

3. Time of Recording

Brunei Darussalam uses the 'release date' as its time of recording, which provides the time/date that stipulated in source documents when goods enter or leave the economic territory.

4. Valuation

Imports are valued at CIF, that is, the value of goods at the frontier of the exporting trading partners plus the cost of insurance and freight and any other charges when sold for export to Brunei Darussalam. Custom duties are not included in the value of imports.

Exports are valued at FOB, that is, the value of goods to be purchased abroad up to the point where the goods are deposited on board the outgoing vessel, aircraft and/or vehicle. Goods on consignment are valued at the current import price for imports and the current export price for exports.

Goods are recorded at their market value. Values are reported in millions of Brunei dollars. Data reported in foreign currencies are converted into local currency at the prevailing market exchange rate on the date of permit clearance.

5. Commodity Classification

Commodity items reported are classified in accordance with the Brunei Darussalam Trade Classification and Customs Duties 2022. This classification incorporates the ASEAN Harmonized Tariff Nomenclature (AHTN), which is based on the 8-digits Harmonised Commodity Description and Coding System Nomenclature (H.S) developed by the World Customs Organisation (WCO).

For International comparability in this report, import and export are classified according to the United Nations Standard Trade Classification, Revision 4 (SITC Rev. 4).

The imports data can also be categorized according to their end-use categories, namely Capital, Intermediate or Consumption based on Brunei Darussalam's Broad Economic Categories (BDBEC), which is adapted from United Nation, the Fifth revision of Broad Economic Categories.

The BDBEC is classified in accordance with Broad Economic Category introduced by the United Nations and as a means for converting data compiled in terms of SITC into end-use categories.

The BDBEC provides categories which can be aligned into 3 classes of goods in the System of National Accounts (SNA):

- Capital Goods are used as a means of producing other goods or services.
- Intermediate Goods are semi-processed, semi-manufactured and industrial-supplies; and transformed or used up in the production of goods and services.
- Consumption Goods are final product mainly used by households for final consumption.

6. Mode of transport

Merchandise trade in goods by mode of transport are compiled according to the means of transport used when goods enter or leave the economic territory of the economy. The following classifications are the main categories of the mode of transport:

1. Air;
2. Sea;
3. Land; and
4. Others include postal consignments, mail or courier shipments and goods crossing the border not to attribute a transaction to any specific mode of transport categories.

The method of transport used for the carriage of goods is recorded as the mode of transport such as aircraft, vehicle, vessel and other type of transport of goods. The mode of transport for imports refers to the last mode of transport by which the cargo was transported to the port of clearance into the economy whereas, for exports the mode of transport information records the last mode of transport with which cargo crossed the customs border on its exit from the economy.
