## Introduction

The Department of Economic Planning and Statistics (JPES) conducted the Labour Force Survey (LFS) 2024 from 14 October to 10 November 2024. The main objective of LFS 2024 was to collect latest information on the size, structure, distribution and characteristics of the labour force, employment, unemployment and other economic characteristics of the population, which will be used to assist in the planning, research, policy-making and management concerning the labour force in the country.

The survey covered about 3,200 selected households throughout the country using systematic sampling method. The data obtained from the selected households were extrapolated according to the sampling weights and then calibrated to represent the total population living in regular households in Brunei Darussalam.

This **Report of the Labour Force Survey (LFS) 2024** presents the final data on the economic activity of the population of Brunei Darussalam in 2024. It provides information on the population of the working age and labour force, labour force participation rate, employment status, type of economic activity, occupation, sector of employment, informal sector and informal employment, working time and income from employment, unemployment as well as labour underutilization. The information on the labour force profile for population aged 18 years and over is included in the report, taking into account the accepted definition of working age in Brunei Darussalam. Information on the labour force profile for population aged 15 years and over is also provided as a reference and recommendation from International Labour Organization (ILO).

The collection and compilation of labour statistics for Brunei Darussalam through the Labour Force Survey 2024 are in line with the international standards, adopted by the 21<sup>st</sup> International Conference of Labour Statisticians (21<sup>st</sup> ICLS) in 2023.

## Findings

### Working Age Population and Labour Force

In 2024, the working age population aged 18 years and over in Brunei Darussalam was 346,000 persons. Out of these, 233,200 persons were in the labour force compared to 227,700 persons in 2023. This represented an increase of 2.4 per cent from 2023 to 2024. The increase in the labour force was mainly attributed to the increase in the total number of employed persons by 2.9 per cent (6,300 persons).

The labour force participation rate increased to 67.4 per cent in 2024 from 67.2 per cent in 2023. This is due to an increase in the number of employed persons, particularly in the private sector.

### Employment

In 2024, there was an increase in the total number of employed persons, with 6,300 more employed persons compared to the previous year. The total number of employed persons aged 18 years and over was 222,300 persons [2023: 216,000 persons] comprising of 133,700 males (60.1 per cent) and 88,600 females (39.9 per cent). Majority of employed persons were local workers, totalling of 158,400 persons (71.3 per cent) with 63,900 persons being non-local workers (28.7 per cent). Out of the total employed, about 214,300 persons (96.4 per cent) were aged between 18 to 59 years.

The total number of both local and non-local workers increased from 2023 to 2024, with local workers increasing by 3.8 per cent (5,800 persons) and non-local workers by 0.8 per cent (500 persons). The increase in local workers was mainly in the private sector, with the workforce growing from 87,000 persons in 2023 to 92,400 persons in 2024. In contrast, the increase in non-local workers was primarily concentrated in the construction activity, which recorded an increase from 14,400 persons in 2023 to 19,600 persons in 2024.

The largest proportion of the employed persons by their employment status were employees, comprising 91.6 per cent (203,600 persons). The number of own-account workers increased from 8,800 persons in 2023 to 10,500 persons in 2024, which may reflect a shift towards entrepreneurial activities and a gig economy supported by digital platforms.

A total of 67,100 persons (30.2 per cent) were employed in the public sector, which includes activities of public administration and government services such as education, health, electricity, and water services. Meanwhile, around 155,200 persons (69.8 per cent) were employed in the private sector.

Employment by economic activity shows that the public administration contributed the largest share at 18.7 per cent (41,600 persons). This was followed by wholesale and retail trade at 12.8 per cent (28,400 persons) and construction at 11.1 per cent (24,600 persons).

The distribution of the employed persons by occupation shows that service and sales workers accounted for the highest share of 22.9 per cent (50,800 persons), followed by professionals at 17.9 per cent (39,700 persons), and technicians and associate professionals at 14.8 per cent (33,000 persons).

## Informal Sector

About 12,200 persons (5.5 per cent of the total employment) were employed in the informal sector, a decrease from 16,000 persons in 2023. The informal sector comprises all unregistered private business enterprises that do not keep record of accounts. It also includes domestic workers engaged by households, which accounted for 66.4 per cent of informal sector employment. The remaining 33.6 per cent or 4,100 persons were employed in other activities mainly in the services sector, which included those running small businesses from their homes and selling traditional delicacies and other food items.

## Informal Employment

Informal employment refers to jobs where employees do not receive social security coverage, paid sick leave, or paid holidays. This concept applies to individuals working within the informal sector, which includes unregistered production units, as well as those in the formal sector. In most cases, if not all, persons who are working in the informal sector are also categorised as having informal employment.

In 2024, the informal employment decreased by 59,500 persons (71.9 per cent), from 82,700 persons in 2023 to 23,200 persons in 2024. This drastic decline is primarily due to the change in methodology and definition of informality by International Labour Organization (ILO), shifting from the 20<sup>th</sup> International Conference of Labour Statisticians (20<sup>th</sup> ICLS) in LFS 2023 to the 21<sup>st</sup> ICLS in LFS 2024.

In 2023, if an employed persons did not receive at least one of the following: social security coverage, paid holidays and paid sick leave, they are classified as informal employment. In 2024, an employed person was classified as informal if they did not receive at least two of the above criteria.

In 2024, about 23,200 persons or 10.4 per cent of the total employed population had informal employment. Of this total, about 50.9 per cent (11,800 persons) were locals, with the majority of them were employees (66.1 per cent or 7,800 persons) and own-account workers (22.9 per cent or 2,700 persons). More than three-quarters of local informal employment (88.1 per cent or 10,400 persons) was concentrated in the services sector, mainly in accommodation and food service activities.

## Working Time and Income from Employment

In 2024, the average hours usually worked per week at the main job were 46.5 hours, compared to 45.8 hours in 2023. Out of the employed population, a small proportion (1.9 per cent) were also engaged in secondary jobs or activities. For all jobs (main and secondary), about 27.0 per cent (60,000 persons) of the employed population, actually worked more than 48 hours per week which is defined as excessive hours of work.

The average monthly income from all jobs in 2024 was BND1,686 per employed person compared to BND1,758 in 2023. Local workers earned a higher income of BND1,879 while the non-local workers earned BND1,208 per month on average. It was observed generally that the average monthly income increased, particularly in the public sector.

The median income from employment increased to BND1,000 from BND960 in 2023. Meanwhile, the median income for local and non-local workers was BND1,200 and BND630 respectively.

## Unemployment and Labour Underutilization

The total number of unemployed aged 18 years and over was 10,900 persons, compared to 11,700 persons in 2023. This comprised of 5,800 males (53.2 per cent) and 5,100 females (46.8 per cent). Among the unemployed, 10,900 persons were aged 18 to 59 years, with 40.4 per cent or 4,400 persons aged 18 to 24 years, 43.1 per cent (4,700 persons) aged 25 to 34 years, and 16.5 per cent (1,800 persons) aged 35 to 59 years.

## Educational Attainment and Duration of Unemployment

The highest share of the unemployed was among those who have attained secondary level education with 52.3 per cent (5,700 persons), followed by tertiary education (31.2 per cent or 3,400 persons), technical and vocational education at 14.7 per cent (1,600 persons), and primary education and below 1.8 per cent (200 persons).

Nearly half (57.8 per cent or 6,300 persons) of the unemployed were seeking for employment for more than 12 months, 21.1 per cent or 2,300 persons for 3 to 12 months, and 21.1 per cent (2,300 persons) for less than 3 months. Of the total unemployed, about 7,700 persons aged between 18 to 59 years had been seeking for employment for 6 months or more.

The total number of local unemployed aged 18 to 59 years was 10,700 persons, of which 40.2 per cent (4,300 persons) were aged between 18 to 24 years. The overall unemployment rate for persons aged 18 years and over in 2024 was 4.7 per cent, a decrease from 5.1 per cent in 2023. The unemployed rate for youths aged between 18 to 24 years was higher at 18.3 per cent compared to 16.8 per cent in 2023.

## Labour Underutilization

The total number of persons affected by labour underutilization was 32,600 persons, either as time-related underemployed (15,600 persons) who worked less than 40 hours, or as unemployed (10,900 persons) or in the potential labour force as available non-jobseekers or unavailable jobseekers (6,100 persons). The labour underutilization rate was 13.6 per cent, compared to 14.9 per cent in 2023.

## Labour Force Profile for Population Aged 15 Years and Over

### Working Age Population and Labour Force

In 2024, population aged 15 years and over was 364,800 persons with total labour force of 233,800 persons. The labour force participation rate increased to 64.1 per cent in 2024 from 63.6 per cent in 2023. This is due to an increase in the number of employed persons, particularly in the private sector.

### Employment

The employed population increased by 2.8 per cent in 2024 to 222,700 persons. Local workers accounted for the largest share of 71.3 per cent (158,800 persons), while 28.7 per cent (63,900 persons) were non-local workers. About 91.6 per cent (203,900 persons) were employees, while those who worked as own-account workers accounted for 4.7 per cent (10,500 persons).

A total of 67,100 persons (30.1 per cent) were employed in public sector and around 155,600 persons (69.9 per cent) were employed in private sector.

Employment by type of occupation, service and sales workers accounted for the highest share at 22.9 per cent (51,100 persons). Meanwhile by type of economic activity, shows that the public administration contributed to the highest share at 18.7 per cent (41,600 persons).

The average monthly income from all jobs in 2024 was BND1,683 per employed person, compared to BND1,755 in 2023. Local workers earned an average income of BND1,874, while the non-local workers earned BND1,208 per month. The average weekly hours worked in the main job slightly increase to 46.5 hours from 45.8 hours in 2023.

### Unemployment and labour underutilization

The total number of unemployed was around 11,100 persons in 2024, compared to 11,900 persons in 2023. The unemployment rate was 4.8 per cent with a youth unemployment rate of 18.5 per cent.

The total number of persons affected by labour underutilization was 33,200 persons, either as time-related underemployed (15,600 persons) who worked actually less than 40 hours, or as unemployed (11,100 persons), or in the potential labour force as available non-jobseekers or unavailable jobseekers (6,500 persons). The labour underutilization rate was 13.8 per cent, compared to 15.2 per cent in 2023.

## Technical Notes

### Concepts and Definitions

The main concepts and definitions used in the survey are as follows:

#### Household:

A household is defined as a group of persons who live together and make common provision for food and other essentials for living. The people in the group may be related or unrelated or a combination of both. A household may consist of only one person or several persons.

#### Reference Period:

This refers to the week preceding the date of the survey interview.

#### Locals and Non-locals:

- a) Local persons are the persons in relation to the immigration laws of the country. The categories are:
  - i) Brunei citizens, i.e. holder of Brunei Darussalam yellow identity card;
  - ii) Permanent resident, i.e. holder of Brunei Darussalam purple identity card.
- b) Non-local persons are the persons in relation to the immigration laws of the country which are Temporary resident, i.e. holder of Brunei Darussalam green identity card; and Others.

## Highest Level of Education Attainment:

Highest level of education attainment is categorized as follows:

### a) Primary and below

Attained education at primary level from year 1-6 or equivalent. Also includes pre-school, adult education or never attended a formal education.

### b) Secondary

Attained education at secondary level from year 7 up to pre-university or equivalent.

### c) Technical & Vocational

Attained education at technical level such as pre-diploma, national diploma or equivalent; or vocational education such as national vocational certificate or equivalent. The education level such as teachers' training, nursing and other similar training is also included here.

### d) Tertiary

Attained education at tertiary level from higher national diploma or advance diploma and higher such as bachelor's degree, master's degree, Doctor of Philosophy, post graduate specialist or professional qualification and others.

This education level is classified according to the Brunei Darussalam Standard Classification of Education (BDSCED) 2021, compatible with the International Standard Classification of Education (ISCED) 1997.

The following concepts and definitions relating to work, employment, and labour underutilization are in line with the international standards adopted by the 21<sup>st</sup> International Conference of Labour Statisticians (21<sup>st</sup> ICLS) in 2023.

## Working Age Population:

Persons in the working age population consist of those aged 15 years and over, and 18 years and over. The working age population aged 15 years and over is according to the recommendations of the International Labour Organization (ILO). However, this report primarily focuses on the working age population of 18 years and over, which reflects the national definition used in Brunei Darussalam.

**Labour Force:**

Persons in the labour force are those who were either employed or looking for job (unemployed) during the reference period.

**Work:**

The starting point of the international standards on statistics of work, employment and labour underutilization is the concept of work defined as:

- “Any activity performed by persons of any sex and age to produce goods or to provide services for use by others or for own use” in line with the General production boundary defined in the System of National Accounts 2008.
- Work is defined “irrespective of its formal or informal character or the legality of the activity.”
- It excludes “activities not involving production of goods or services (begging, stealing), self-care (personal grooming, hygiene) and activities that cannot be performed by another person on one’s own behalf (sleeping, learning, own recreation).”

The international standards recognize different forms of work:

- Own-use production work (production of goods and services for own final use); - employment (work performed for others in exchange for pay or profit);
- unpaid trainee work (work performed for others without pay to acquire workplace experience or skills);
- volunteer work (non-compulsory work performed for others without pay); and - other forms of work (not defined at this time by the international standards, e.g., community work by prisoners, ordered by court or similar authority).

## **Employment:**

Employment is a particular form of work. Persons in employment are defined as all those with working age population, during a short reference period, were engaged in any activity to produce goods or provide services for pay or profit. It excludes persons engaged wholly in activities to produce goods or services for own final use such as producing agricultural, fishing and gathering products for own-consumption or cleaning, decorating, gardening and maintaining one's own dwelling or premises, durables and other goods.

## **Persons in employment comprise:**

- employed persons “at work,” i.e., who worked in a job for at least one hour; and
- employed persons “not at work” due to temporary absence from a job, or to working-time arrangements (such as shift work, flexi-time and compensatory leave for overtime).

## **Employment status:**

Employment status refers to the position of the employed person at his/her place of work with regard to employment characteristics.

### **a) Employers:**

A person who runs a business on his own or in partnership and engages at least one paid employee on a continuous basis in operating the business.

### **b) Employees:**

A person who works in government department, private business enterprises or organizations, including family business, and receives regular pay.

### **c) Own-account workers:**

A person who runs a business on his own or in partnership but does not engage any paid employee.

### **d) Contributing family workers:**

A person who works in his/her family business without receiving any regular pay.

**Occupation:**

Occupation refers to the kind of work done during the reference period by the person employed. It is defined as a set of tasks and duties performed, or meant to be performed, by one person. The occupation is classified according to the Brunei Darussalam Standard Occupational Classification (BDSOC) 2021, compatible with the International Standard Classification of Occupation (ISCO) 2008.

**Branch of Economic Activity:**

Branch of economic activity refers to the type of economy activity of the establishment, farm, business or organisation where the person works, as determined by the goods or services produced or provided to other units or persons. The industry is classified according to the Brunei Darussalam Standard Industrial Classification (BDSIC) 2021, which is compatible with the International Standard Industrial Classification (ISIC - Rev. 4).

**Labour underutilization:**

Labour underutilization refers to mismatches between labour supply and demand, which translate into an unmet need for employment among the population. Measures of labour underutilization include, but may not be restricted to unemployment; time-related underemployment; and potential labour force.

**Unemployment:**

Persons in unemployment are defined as all those with working age population during the reference period who:

- a) were not in employment;
- b) carried out activities to seek employment during a specified recent period; and
- c) were currently available to take up employment given a job opportunity.

The definition of unemployment provides an exception in the case of future starters. They are considered as unemployed even if they did not carry out activities to seek employment during the specified recent period, criterion (b) as long as they satisfy the availability condition.

## Time-related underemployment:

Persons in time-related underemployment are defined as all persons in employment who, during a specified reference period:

- a) wanted to work additional hours,
- b) whose working time in all jobs was less than a specified hours threshold, and
- c) who were available to work additional hours given an opportunity for more work.

The hour-threshold was set at 40 hours of work during the reference week at all jobs. It corresponds to the modal value of the distribution of hours actually worked at all jobs during the reference week.

## Outside Labour Force:

Persons in the outside labour force are those who were not working, did not have job and were not actively seeking for work during the reference period.

Persons who are categorised as outside labour force include homemakers, students, pensioners and others such as disabled persons.

## Potential labour force:

Potential labour force is defined as all persons above a specified age who, during the short reference period, were neither in employment nor in unemployment but who were considered as either:

- a) unavailable jobseekers (seeking employment but not currently available) or
- b) available potential jobseekers (currently available for employment but did not carry out activities to seek employment).

## Labour Force Participation Rate:

Labour force participation rate is the ratio of labour force population to the total working age population.

$$LFPR = \frac{LF}{WAP} \times 100$$

where

<i>LFPR</i>	is the labour force participation rate
<i>LF</i>	is the total labour force population
<i>WAP</i>	is the total working age population

## Employment to Population Ratio:

Employment to population ratio is the ratio of the employed population to the working age population.

$$ER = \frac{E}{WAP} \times 100$$

where

<i>ER</i>	is the employment to population ratio
<i>E</i>	is the total employed population
<i>WAP</i>	is the total working age population

## Unemployment Rate:

Unemployment rate is the proportion of the unemployed population of the total labour force population.

$$UR = \frac{U}{LF} \times 100$$

where

<i>UR</i>	is the unemployment rate
<i>U</i>	Is the unemployment population
<i>LF</i>	<i>is the total labour force population</i>

## Informal Sector:

The informal sector comprises all unregistered or unincorporated businesses owned by individuals, households, or private business enterprises that are not officially registered and do not keep record of accounts (assets and expenditures).

## Informal Employment:

Informal employment refers to jobs held by employed persons who produce goods or provide services for pay or profit but are not covered by formal employment arrangements such as social security coverage, paid holidays, or paid sick leave. A person is classified as informally employed if they do not receive at least two of these formal arrangements.

## Rounding of Estimates:

Individual figures are independently rounded to the nearest hundred; hence the group totals may not always equal to the sum of the individual figures.

## Methodology

The collection and compilation of labour statistics for Brunei Darussalam through the Labour Force Survey are in line with the international standards, adopted by the 21<sup>st</sup> International Conference of Labour Statisticians (21<sup>st</sup> ICLS) in 2023.

### Scope of the survey

The survey covered all persons living in private households. It excluded the institutional population permanently residing in houses such as hostels; hospitals; correctional establishments etc., as well as persons living in seasonal dwellings not covered in the survey. It also excluded workers living at their work-sites.

### Sampling design and estimation procedure

The survey is designed to provide annual data on the economic activity of the household population of Brunei Darussalam, in particular, employment, unemployment and other components of labour underutilization, status in employment, branch of economic activity, occupation, informal sector and informal employment, working time and income from employment. The LFS questionnaire is designed in line with the concepts and definitions of the International Labour Organization (ILO) standards adopted by the 21<sup>st</sup> ICLS in 2023.

The Brunei Darussalam LFS 2024 was based on a sample of 3,200 households drawn according to a two-stage stratified sample design. In the first stage, 252 geographic areas (segments or sub-segments) were selected with probabilities proportional to size, measured in terms of the number of households according to the Population and Housing Census (BPP) 2021; and at the second stage, a fixed number of households (13) were selected in each sample geographic area with equal probabilities by systematic sampling. (Table A).

**Table A: Main elements of sample design, 2024**

Sample Design	Number
<b>Design sample size (Households)</b>	3,200
Number of sample segments	252
Sample-take (Households)	13
<b>Effective final sample size</b>	
Households	3,131
Number of Persons	14,274
Male	7,302
Female	6,972
Average Household size	4

The sampling frame was stratified by district and urban/rural area, forming a total 8 strata, covering all persons living in residential dwellings, excluding the population living long-term in institutional and non-residential dwellings.

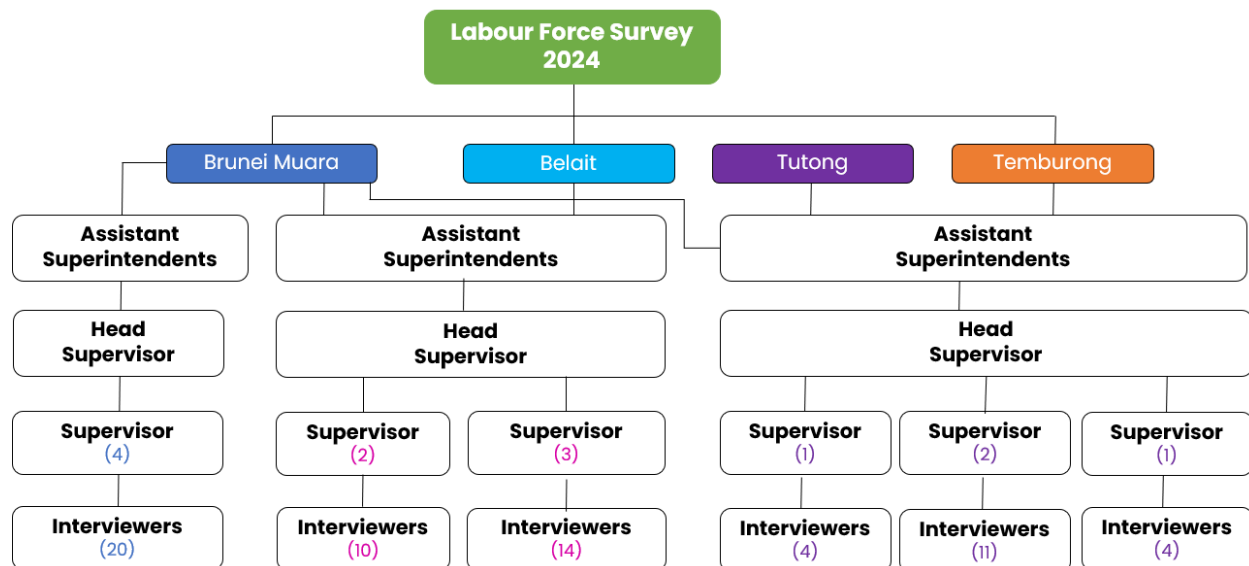

The survey estimates were obtained by extrapolation of the sample results with appropriate sampling weights calculated by taking into account the probabilities of selection of the different units, adjusted for survey response and non-response, and calibrated to the population totals based on the mid-year population estimates by sex, broad age group and local/non-local population, appropriately modified for the scope and the reference period of the survey.

# LABOUR FORCE SURVEY 2024

## Field operations

The field operations were conducted from 14 October to 10 November 2024. It involved 63 interviewers and 13 supervisors organized in 4 district teams, each composed of 4-6 interviewers and one supervisor.

The temporary survey field workers (interviewers and supervisors) received five days of training a week prior to the field operations. Sufficient time was allocated for the survey field workers to review the manual and study their respective sample segments using the specialized maps and address lists of sample households selected for the survey.

# LABOUR FORCE SURVEY 2024

The page features two large, abstract green geometric shapes. One is a triangle on the left side, and the other is a more complex polygon on the right side, both pointing towards the center where the text is located.

## APPENDIX TABLES

Table 1: Labour Market Indicator aged 18 years and over by Sex, 2023 to 2024

Persons
