INTERNATIONAL MERCHANDISE TRADE STATISTICS

OCTOBER 2025

BND Million

INTERNATIONAL MERCHANDISE TRADE STATISTICS (IMTS) OCTOBER 2025

Highlights

Year-on-Year Change

Total trade for October 2025 was BND1,747.7 million, comprising exports of BND1,147.5 million and imports of BND600.2 million. This reflected a year-on-year increase of 4.1 per cent from BND1,678.3 million in October 2024.

Meanwhile, the trade balance also increased by 24.1 per cent to BND547.3 million (October 2025) from BND440.9 million in October 2024.

Month-on-Month Change

On a month-on-month basis, total trade rose by 3.1 per cent, increasing from BND1,695.7 million in September 2025 to BND1,747.7 million in October 2025.

Merchandise Exports

Exports by Commodity Section

On a year-on-year basis, the merchandise exports increased by 8.3 per cent to BND1,147.5 million in October 2025 from BND1,059.6 million in October 2024. Mineral Fuels accounted for the highest share of total exports at 76.9 per cent (BND882.6 million), followed by Chemicals at 20.1 per cent (BND230.5 million) and Machinery and Transport Equipment at 1.5 per cent (BND16.8 million).

Meanwhile, on a month-on-month basis, the merchandise exports also increased by 12.0 per cent from BND1,025.0 million in September 2025 to BND1,147.5 million in October 2025.

Main Exports

On a year-on-year basis, the main exports increased by 8.4 per cent in October 2025, mainly due to increases in exports of Mineral Fuels by 20.1 per cent while the exports of Chemicals decreased by 21.2 per cent.

In October 2025, the increase in exports of Mineral Fuels was driven by a 145.3 per cent rise in the exports of Crude Oil, from BND92.1 million in October 2024 to BND225.9 million (October 2025). Furthermore, the exports of Other Petroleum Products also increased by 13.6 per cent from BND345.2 million in October 2024 to BND392.2 million. However, the exports of Other Gas Products and LNG decreased by 15.1 per cent and 10.5 per cent respectively.

The exports of Chemicals decreased by 21.2 per cent, led by a 40.1 per cent reduction in Methanol from BND22.2 million to BND13.3 million. Meanwhile, the exports of Chemicals and Related Products also decreased by 19.6 per cent from BND268.2 million to BND215.6 million in October 2025.

On a month-on-month basis, the main exports also recorded an increase of 11.2 per cent in October 2025. This was due to increases in exports of both Mineral Fuels and Chemicals increased by 12.3 per cent and 7.0 per cent respectively.

Exports by Trading Partners

The highest share of exports in October 2025 went to Australia with a share of 23.2 per cent, followed by Japan at 15.4 per cent and People's Republic of China at 15.3 per cent.

Chart 2: Share of Exports by Trading Partners

Merchandise Imports

Imports by Commodity Section

In October 2025, merchandise imports declined by 3.0 per cent to BND600.2 million compared to BND618.7 million in October 2024. Mineral Fuels recorded the highest share of total imports at 55.9 per cent (BND335.3 million) followed by Machinery and Transport Equipment (BND74.4 million) and Food (BND61.7 million).

Meanwhile, on a month-on-month basis, total imports recorded a decrease of 10.5 per cent, mainly attributed to the decrease in the imports value of Mineral Fuels by 18.9 per cent. Followed by decrease in imports of Miscellaneous Manufactured Articles; Chemicals; and Machinery and Transport Equipment.

Imports by Trading Partners

The highest share of imports in October 2025 came from Malaysia, accounting for 29.5 per cent, followed by Kazakhstan (15.4 per cent) and Australia (11.0 per cent).

Chart 3: Share of Imports by Trading Partners

Imports by End-Use Categories

In October 2025, the import of Intermediate Goods was valued at BND365.5 million, accounting for 60.9 per cent of total imports. This was followed by Capital Goods (BND206.6 million or 34.4 per cent of total imports) and Consumption Goods (BND28.1 million or 4.7 per cent of total imports).

Main Mode of Transport

The main mode of transport for Brunei Darussalam's international merchandise trading is sea transport, followed by air and land.

In October 2025, the total value of goods transported by sea for both exports and imports was BND1,631.6 million. The relative share of sea transport accounted for 98.4 per cent of exports and 83.7 per cent of imports. Goods transported by air contributed about 1.5 per cent of goods exports and 11.7 per cent of goods imports, while cross-border trading via land recorded 0.2 per cent of exported goods and 4.5 per cent of imported goods.

Table 6: Exports and Imports by Mode of Transport

TECHNICAL NOTES

1. Introduction

The International Merchandise Trade Statistics (IMTS) are compiled on a monthly basis based on the imports and exports data submitted by the Royal Customs and Excise Department, Ministry of Finance and Economy through customs declarations, and the Department of Energy, Prime Minister's Office. The general system of recording IMTS adopted by Brunei Darussalam covers imports, domestic exports and re-exports that have been cleared through customs.

2. Coverage of Merchandise

All goods imported into or exported from Brunei Darussalam are included in the IMTS.

The following classes of goods are excluded:

- currency notes and coins in circulation;
- personal and household effects which do not incur any Brunei Darussalam customs duty and which are taken by passengers for their own use;
- stores and fuel supplied to Brunei ships and aircraft;
- articles on loan or rent, for example, equipment for oil surveys and experimental drilling, etc.;
- goods in transit;
- fish and other marine products landed from Brunei Darussalam fishing vessels direct from fishing grounds;
- goods imported and exported by or on behalf of diplomatic services; and
- goods imported by the armed forces.

3. Time of Recording

Brunei Darussalam uses the 'release date' as its time of recording, which provides the time/date that stipulated in source documents when goods enter or leave the economic territory.

4. Valuation

Imports are valued at CIF, that is, the value of goods at the frontier of the exporting trading partners plus the cost of insurance and freight and any other charges when sold for export to Brunei Darussalam. Custom duties are not included in the value of imports.

Exports are valued at FOB, that is, the value of goods to be purchased abroad up to the point where the goods are deposited on board the outgoing vessel, aircraft and/or vehicle. Goods on consignment are valued at the current import price for imports and the current export price for exports.

Goods are recorded at their market value. Values are reported in millions of Brunei dollars. Data reported in foreign currencies are converted into local currency at the prevailing market exchange rate on the date of permit clearance.

5. Commodity Classification

Commodity items reported are classified in accordance with the Brunei Darussalam Trade Classification and Customs Duties 2022. This classification incorporates the ASEAN Harmonized Tariff Nomenclature (AHTN), which is based on the 8-digits Harmonised Commodity Description and Coding System Nomenclature (H.S) developed by the World Customs Organisation (WCO).

For International comparability in this report, import and export are classified according to the United Nations Standard Trade Classification, Revision 4 (SITC Rev. 4).

The imports data can also be categorized according to their end-use categories, namely Capital, Intermediate or Consumption based on Brunei Darussalam's Broad Economic Categories (BDBEC), which is adapted from United Nation, the Fifth revision of Broad Economic Categories.

The BDBEC is classified in accordance with Broad Economic Category introduced by the United Nations and as a means for converting data compiled in terms of SITC into end-use categories.

The BDBEC provides categories which can be aligned into 3 classes of goods in the System of National Accounts (SNA):

- Capital Goods are used as a means of producing other goods or services.
- Intermediate Goods are semi-processed, semi-manufactured and industrial-supplies; and transformed or used up in the production of goods and services.
- Consumption Goods are final product mainly used by households for final consumption.

6. Mode of transport

Merchandise trade in goods by mode of transport are compiled according to the means of transport used when goods enter or leave the economic territory of the economy. The following classifications are the main categories of the mode of transport:

1. Air;
2. Sea;
3. Land; and
4. Others include postal consignments, mail or courier shipments and goods crossing the border not to attribute a transaction to any specific mode of transport categories.

The method of transport used for the carriage of goods is recorded as the mode of transport such as aircraft, vehicle, vessel and other type of transport of goods. The mode of transport for imports refers to the last mode of transport by which the cargo was transported to the port of clearance into the economy whereas, for exports the mode of transport information records the last mode of transport with which cargo crossed the customs border on its exit from the economy.
